The hue and cry of dnngers from this source is too absurd, and no intelligent man believes that there is any such danger It is a mere pretext of demagoguism ingenious gotten up by intriguing politicians, to alarm the ignorant, and make capital by which they may ride into office and power. Were it true that those of foreign birth were disposed to assume the contro of our country, and change the character of our government, there would still be no ground for alarm, for the number of the foreign-born is far inferior to that of the native-born citizens, and our statistics show that the proportionate increase of native-born citizens is far greater than the increase of emigrants from foreign countries, and the God of Nature has destined it so to be. Hence, the foreign-born could not control our government if they would, and they would not if they could.
